About KPI Ultrasound

KPI builds customer relationships to last...the same way we rebuild our ultrasound systems. Medical dealers from around the world trust KPI, and buy from us time and again because our processes and ethics produce lasting confidence. Why buy your next new or rebuilt ultrasound machine from KPI?

- 1) You'll get the system you want
- 2) You'll get it done right
- 3) You'll get it faster.

KPI has been in business over 20 years and has a large staff with deep specialized technical expertise in all major brands. KPI has a dedicated sonographer, board-level repair engineer, master painter, and 8 biomed engineers, each with different brand specializations. This allows us to rebuild & stock machines from Philips, GE, Siemens, Toshiba, Medison, and several other manufacturers. KPI's mission is to go beyond the traditional refurbishing process that most of our competitors offer by rebuilding each ultrasound system with such exacting detail that it is restored to like-new status. It's like certified pre-owned, for ultrasound machines.

KPI keeps one of the largest standing inventories available of used and rebuilt ultrasound machines as well as probes of all types. This means you're more likely to get just the brand and model ultrasound machine you're looking for, shipped in days rather than weeks or months.

Ultrasound machines rebuilt by kpi

KPI rebuilds used ultrasound machines to like-new condition and sells them at a fraction of the cost of buying new. KPI carries the following ultrasound machines:

Philips iE33, iU22, HD15, HD11xe, HD9, HD7xe, HD3, Envisor, Sonos 7500, Sonos 5500

ATL HDI-500, HDI-4000

GE Voluson E8, Voluson 730, Voluson e, Voluson i, Vivid S6, Vivid 7, Vivid q, Vivid i, Logiq P5, Logiq 9, Logiq 7, Logiq 5, Logiq

Acuson Sequoia 512, Cypress
